BAC Calculator Crack License Key Full Free Download

BAC Calculator is an easy to use, very user-friendly, alcohol counter tool. BAC Calculator is very easy to use, as you just have to enter basic data, like the number of ounces of the alcoholic beverages you consumed, the duration of drinking, and the weight of your body. The simple but effective app displays the blood alcohol concentration (BAC) as well as a breakdown of every drink. It provides you with the following estimations: - Drinking duration - Alcohol content - Blood alcohol concentration (BAC) - Actual alcohol consumption - BAC percentage - BAC by volume - BAC by weight - Alcohol BAC for reference - Drink break down - BAC/oz/dg - BAC/oz/hr - BAC/lb/dg - BAC/lb/hr - BAC/kg/dg - BAC/kg/hr - BAC/min This alcohol calculator is designed to help those who drink to help prevent a situation where they find it difficult to drive after drinking. How to Use: 1. You need to enter the following details: - Quantity of Alcoholic Beverages (ounces) - Duration of Drinking - Your Weight 2. You can then press the button below to display the following screen: 3. The calculator will then begin calculating the BAC for you. 4. If you press the button again after the first calculation, the screen will display the following information: - Blood Alcohol Concentration (BAC) - Alcohol consumption - BAC percentage - Actual BAC for reference 5. You can then press the buttons below to select the following information: - BAC/oz/dg - BAC/oz/hr - BAC/lb/dg - BAC/lb/hr - BAC/kg/dg - BAC/kg/hr - BAC/min 6. To get a printout of the information, press the button below. To exit the application, press the button below. Suggestions: We understand that you may have questions regarding BAC Calculator. Therefore, we have provided you with a few suggestions. - You might be drinking because of an underlying medical condition. If you are a diabetic, we suggest you consult your doctor before drinking alcohol. - You might be underage and therefore

What's New in the BAC Calculator?

BAC Calculator is a very easy to use application that will help you check if you are fit to drive after consuming alcoholic beverages. All you have to do is provide a few details, like the quantity of fluids ingested (in ounces), the percent of alcohol contained by the drinks, your weight (in pounds) as well as the duration of drinking. The blood alcohol concentration and a small analysis will be displayed instantly after you press the button in the main window of the program. Please note that these are estimations and should not be taken into consideration as official figures. The best way to be driving safely is without having consumed any alcoholic drinks. Usage: BAC Calculator is a very easy to use application that will help you check if you are fit to drive after consuming alcoholic beverages. All you have to do is provide a few details, like the quantity of fluids ingested (in ounces), the percent of alcohol contained by the drinks, your weight (in pounds) as well as the duration of drinking. The blood alcohol concentration and a small analysis will be displayed instantly after you press the button in the main window of the program. Please note that these are estimations and should not be taken into consideration as official figures. The best way to be driving safely is without having consumed any alcoholic drinks. Functionality The main screen of the BAC Calculator will show several informative charts including the following: A simple graph that will illustrate the blood alcohol concentration and the percentage of alcohol contained by the drinks. A graph of the blood alcohol concentration that will be increasing as the percentage of alcohol increases in the drinks. A graph that will illustrate the changes that will be taking place in the blood alcohol concentration during the drinking session (duration). A graph of the estimated alcohol level and the duration of drinking. A chart with the total number of drinks, the number of alcoholic drinks and the total number of ounces consumed. The application supports the following values: Categories of alcoholic drinks: beer (beer, ale, pilsener, etc.), wine (red, white, rose, etc.), cider (apple, apple-cider, etc.), cocktail, distilled spirits (whisky, vodka, brandy, etc.), cocktails (martini, vodka sour, etc.).
