Features: Fast and easy to use Compatible with most popular video formats Light on system resources High quality and sound Evaluation: Summary: The EArt Video Joiner free video and audio cutter, video merger, converter, cutter, ripper and splitter program runs smoothly on all Windows operating systems and has good responsiveness. But I recommend the paid version, EArt Video Joiner Pro, which will do more than what this free version can do. EArt Video Joiner is a Windows application with well designed interface, user friendly and quite simple in use. It does not require much resources. It has good support of multiple formats. The time to cut and join the video file was okay. But it is limited to very few extension only. I have to work with another software to add different file extension. It has many features that will satisfy most of its users. But it could be updated with better quality and support more extensions. One more point is, this software requires a 64-bit version only. So it is recommended to check and update the version before you downloading. If you are using 32-bit Windows. It could be the reason why you are not able to cut and join the video file. Screenshot: You can try the EArt Video Joiner demo version before you purchasing it. This is the best way to decide if this is actually for you or not. If you like the demo version, then just go ahead and purchase it. If not, then dont bother to waste your time. EArt Video Joiner runs slow while adding file to the batch list. I have checked this application on my old laptop and found this application lagging when doing the job. The problem was solved after I turned off the anti-virus and backup on the laptop. I guess it is the anti-virus that causes this problem. It could be the same with other anti-virus too. You may have a similar problem with other anti-virus too. To solve this problem you can turn off the anti-virus. But you have to be careful when doing that. EArt Video Joiner Free is easy to use with its simple interface and does exactly what is required.
