
Limdep Software Free Download

[Download](#)

NLOGIT, an extension of LIMDEP, is the leading full-featured statistical software for maximum likelihood estimation and polynomial choice modeling. Based on the LIMDEP programming language, NLOGIT provides full support for optimizing forecasting and trending based on statistical calculations. It also contains a built-in simulation module containing all the necessary modeling tools as well as a complete set of predictive algorithms for all tasks you may encounter in research, risk analysis and software development.
