From there, you can make the image any size you like by clicking the little square tool (see Figure 8-3). **Figure 8-3** You can use the little square tool to make any image any size you like. When you're finished, you can either save the image in the same format as your original or save it in a different format. You can also print the image in several sizes. Photoshop Elements also includes the capability to resize and crop images, as well as a basic level of retouching.

Although he was guarded by a Seminole, Robinson also was guarded by a Miami guard, Daiquan Romero. Robinson had 9 rebounds, 0 blocks, 1 steal and 4-of-8 shooting. Still, Robinson did a much better job playing with and against his guards than he did with wings or centers. Can he make a difference against Kentucky? Robinson will get to shoot, drive and pass on the court. He will have a full day of practice and match-up opportunities with Kentucky's smaller frontline, which will likely send UF's mid-range game aside early, especially with Jermaine Lawrence and Duke Johnson both seemingly out of the high post rotation. And he needs to be more aggressive. He was going to the rim, but he didn't finish or finish well. But Robinson is a good decision maker. He can find a small pocket in which to shoot, and when he does score, he usually makes his teammates better. UF needs him to prove he can make them better and not
