Graphical user interfaces AutoCAD Activation Code 2004 introduced a new interface that was branded as "AutoCAD". AutoCAD 2007 introduced a new interface, "AutoCAD LT 2007", for applications with lower security requirements. Autodesk was criticized for confusing the traditional meanings of "AutoCAD" and "AutoCAD LT". The name AutoCAD 2007 was criticized as the new name was similar to the old name. In 2010, a new UI was released with the application name AutoCAD 2011. This was intended to present a greater degree of consistency between applications. The graphics changed dramatically in 2012 and 2013 with the release of AutoCAD 2012 and AutoCAD 2013. The graphics had been drastically changed and extended to other applications such as AutoCAD Architecture and Autodesk Revit, to both address complaints of inconsistency and make all versions more like one another. AutoCAD 2015 was released with a new user interface that went back to the familiar look of earlier versions. AutoCAD 2017 was released with a new user interface that also went back to the familiar look of earlier versions. See also List of computer-aided design
