### Armi Project Cairo International Airport Heca Fs2004

the airport will be served by about 50 domestic and 40 international destinations. the project cost about egypt 400 million and is funded by the egyptian government. the airport will have two terminals (one for domestic flights and another for international flights). the project will employ 1,000 workers when fully operational. the airport will have a paved apron of about 27,000 square meters and a ramp of about 16,000 square meters. the p3dv4 cairo international airport heca is a very detailed airport for fsx and fs2004. this is the result of a lot of work and hard work by a team of young designers and developers. the result is: 2.5km of runway, 2.1km of taxiways, 5 hangars, 2 terminals, 2 restaurants, 2 hotels, 2.6km of ramps and a 4.9km long dual runway capable of handling a boeing 747. it can simulate at a speed of 200kts thanks to the new aigear engine, which is the only engine capable of running p3dv4, and without the bugs caused by it. the textures are detailed and made with care for a perfect lighting, even on the clouds. also, thanks to our texture designer, the cloud textures and the runway lights are made with care for a perfect lighting. this is the first time that airport textures are made with this detail in a 3d simulator. finally, you can also take a look at the pictures that we have taken to show how it will look like. we hope that you'll like it. welcome to the site hello, my name is clement and i'm a student of architecture. i've made this airport, because i didn't find any airport to study at the university, and i'm a fan of airports. this was the result of my work for my graduation project. i hope that this project is useful for all of you. i've never been on a plane, but i think that it's a great way to discover the world. i hope that you like it, and i'll be very happy if you like this project. and i'm very grateful for all the support that you have given me. good-bye.
