Feeling a little out of date? Well, there is a good reason. It also allows the user to use the 'Magic Wand' tool to select areas of the photograph and 'lasso' them. Now this feature can be found built in to newer software and the camera. Even so, some jobs still need Photoshop. Some jobs still need Photoshop for certain software to merge effects and textures together. What really takes Photoshop to the next level is that it can edit a photo or a file created as a JPEG, TIFF, or PSD. Photoshop can make the image look better by using a graduated filter or doing some black and white conversions or color changes. Even when software as good as Photoshop has been around, Photoshop still shines for this quality of art.
